

ENTERPRISE LICENSING

The SQL Spreads Enterprise licensing is a solution to simplify large scale usage of the SQL Spreads Data Management solution.

ABOUT SQL SPREADS

SQL Spreads is a lightweight Data Management solution for SQL Server. With the use of Excel as the front end for managing the data in SQL Server, users can get up and running in minutes. Built-in Data validation, Integrity checks with key lookups, conflict detection, and change tracking guarantee your corporation's data quality. SQL Spreads has over 400 customers in more than 40 countries, such as Adobe, BASF, DuPont, Microsoft, Stanford, and the United Nations.

Benefits

The SQL Spreads Enterprise license is designed to optimize the use of the SQL Spreads Data Management solution in larger organizations with hundreds or thousands of users. The SQL Spreads Enterprise license offers high-end support, simplifies deployment, and has a purchasing process tailored for Enterprise customers.

PRIORITY SUPPORT

The SQL Spreads Enterprise license includes our very best support service to make your everyday use of the SQL Spreads Data Management solution as smooth as possible. The SQL Spreads Enterprise license support includes high priority support tickets and screen sharing support. We know that quickly resolving unexpected issues can be critical. That is why our Enterprise license support also includes critical level support tickets that will have our highest level of priority and give you direct contact to our developers with the possibility to get priority patch releases.

- ✓ High priority tickets.
- ✓ Screen sharing support sessions.
- ✓ Critical level support tickets with direct contact to developers.

FLEXIBLE PURCHASING

The purchasing of the SQL Spreads Enterprise license is tailored for the needs of larger organizations. Payments can be done by credit card or invoice, with the possibility to get invoiced through 3rd party invoice management tools. During the purchasing process, we offer pre-access to licenses before payment to enable the customer to continue to work with the product uninterrupted. The SQL Spreads Enterprise license also includes the possibility to do security assessments and master license agreements.

- ✓ Flexible payment by invoice or credit card.
- ✓ Pre-access to licenses before payment.
- ✓ Possibility for security assessments and master license agreements.

LARGE SCALE DEPLOYMENT

The SQL Spreads Enterprise license is designed to simplify installation and maintenance of the SQL Spreads Excel Add-In for larger groups of users. To simplify deployment, SQL Spreads supports packaged MSI-deployments through System Center Configuration Manager. The SQL Spreads Enterprise license also comes with a common license key for all users that can be automatically distributed together with the application. Lastly, for smooth license management the SQL Spreads Enterprise License includes the License Manager web application for an overview of licenses and easy transfer of licenses between users.

- ✓ One common license key for all users to distribute with MSI-package.
- ✓ License Manager web application for easy transfer and management of licenses.
- ✓ Support for packaged MSI-deployments.

Pricing

The SQL Spreads Enterprise license is a per-seat license solution. You can transfer licenses between users an unlimited number of times and you can freely assign a license either to a user creating solutions as a Designer, or an end-user who updates and manages the data as a Data Editor.
